

# Printable Passport: INSTRUCTIONS

Thank you for downloading this printable passport from [www.mommymaleta.com](http://www.mommymaleta.com)! After a quick print, cut, and tie, you'll be ready to document your journey around the world, one suitcase at a time.

## STEP 1:

Print out the cover, title page and up to seven copies of the stamp page.

If you want to be really fancy, you can print the cover on card stock, and the stamp pages double sided!

*TIP: If you plan to print double-sided stamp pages, make sure your printer's margin settings are equal on all sides. The design is centered within the page, so as long as all of the print margins are equal, you won't run into any issues when cutting out the pages.*

## STEP 2:

Using scissors, cut out the cover, title page, and stamp page(s).

## STEP 3:

Fold each page in half, making sure the cover is the outer most page. Use a stapler, or needle and thread, to bind all of the pages together, through the center crease.

*OPTIONAL: For a more authentic looking passport, you can cut the title page in half, and glue the name page to the inside of the cover page!*

## STEP 4:

Fill out the title page with your photo and information, and start adding stamps to your passport book!
